HelioCloud Security Questionnaire

Synthetic vendor response
Submitted: 5 August 2026
Reference: TPRM-2026-087

Access control

Single sign-on and multi-factor authentication are supported. Access reviews are performed quarterly.

Resilience

Recovery exercises are scheduled annually. The most recent completed exercise was eighteen months ago.

Subprocessors

Four subprocessors handle customer metadata. Material changes are communicated through the service portal.

This document is entirely fictional and was generated for a product demonstration.
